

UNCOATED PLYWOOD GRADES

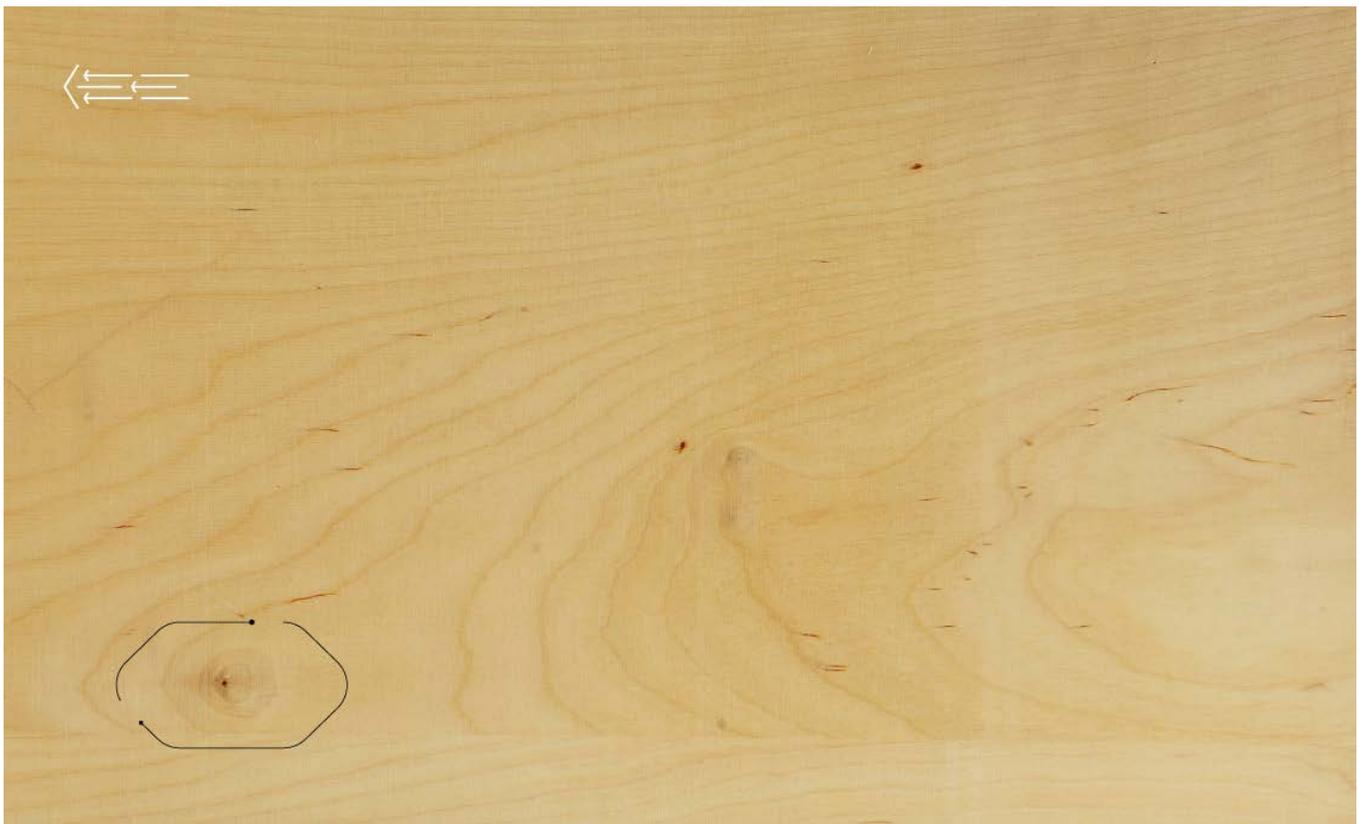

Riga Ply grading conditions are in compliance or stricter in comparison with requirements set by the following regulatory documents:

- EN 635-2 Plywood – Classification by Surface Appearance – Part 2. Hardwood;
- SFS 2413 quality requirements for appearance of plywood with outer plies of birch;
- ISO 139 Recommendations and Conditions Drawn by Work Group II of the Technical Committee (1994).

Recommended applications of Riga Ply, depending on grade.

Grade	Recommended application	
S (II)	For good quality staining and lacquering	
BB (III)	For interior finishing and coating with transparent and non-transparent thicker overlays and films, veneering and applications where a solid face is required.	
WG (IV)	For use where surface appearance is not important, reverse grade.	

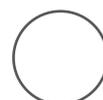

GRADE

Total number of permitted categories of defects per panel		
≤6	≤9	Unlimited

* If the machined panel is smaller than the minimum unit defined in the table (1 m², 1 meter of width), then from the point of view of quality assessment its size shall be equated to 1 m² or 1 meter of width.

* The provided information is for reference only. Wood is a living material, therefore each panel is unique and differences are possible.

* Please note that the table will be regularly updated.
The latest version will always be available on www.finieris.com website.
